PROFILE

Final-year IT Security student with hands-on internship experience at a bank in vulnerability management, governance, risk and compliance (GRC), penetration testing and SOC operations. Building toward a career in cloud security and studying for AWS Certified Cloud Practitioner.

EDUCATION

German International University (GIU)

B.Sc. Informatics and Computer Science, IT Security major

Sep 2023 – Sep 2027

Relevant coursework: Cryptography, Network Security, Ethical Hacking and Penetration Testing, Digital Forensics, Software and Mobile Devices Security, Business Continuity and Risk Management.

German International University in Berlin (GIU Berlin)

Exchange semester (5th semester), Cybersecurity

Berlin, Germany

Sep 2025 – Feb 2026

EXPERIENCE

Information Security Intern

Ebank

Aug 2026 – Jan 2027

New Cairo, Egypt

- Rotated across the bank's vulnerability management, GRC, penetration testing and SOC teams.
- Ran vulnerability scans with Tenable and analyzed the findings by CVE and plugin.
- Worked with the GRC team on employee risk assessments aligned with ISO/IEC 27001.
- Ran phishing simulations to test employees' security awareness.
- Performed internal network penetration tests across each floor of the bank's offices.
- Used IBM QRadar (SIEM) with the SOC team to monitor and analyze security events.

Cybersecurity Intern

ICT Misr

Jul 2024

Sheikh Zayed, Giza, Egypt

- Shadowed cybersecurity staff in their daily work, learning how businesses apply security in practice.
- Observed how the team works with clients and handles their security needs.
- Built foundational knowledge of core security concepts, common threat vectors and basic security controls.

PROJECTS

Personal site: lectrik0.github.io | HTML, CSS, JavaScript, GitHub Actions, AWS CloudFormation

2026

- Built a static portfolio with a strict Content Security Policy and Trusted Types, blocking XSS by design.
- Tested it against XSS payloads (event-handler, script and javascript: URL injection); none executed.
- Self-hosted all assets (zero third-party requests) and published an RFC 9116 security.txt.
- Wrote AWS infrastructure as code (S3, CloudFront, security headers) with keyless GitHub Actions deploys via OIDC.

CERTIFICATIONS

AWS Certified Cloud Practitioner

In progress

SKILLS

Security: Vulnerability scanning, network penetration testing, phishing simulation, risk assessment, web security (XSS, CSP), cryptography

Tools: Tenable, IBM QRadar (SIEM), Git, GitHub Actions

Cloud: AWS core services, IAM, S3, CloudFront, CloudFormation

Systems & code: Networking, Linux, Python

Standards: ISO/IEC 27001

Spoken languages: English (full professional proficiency), Arabic (native)
